

SUSPENDED PERSONAL PLATFORM TRAINING VERIFICATION

Structural Steel and Precast Erectors

Instructions:

Note: The following steps should be administered by a competent project superintendent in order successfully train an employee for proper use of suspended platforms.

Step 1: Instruct the employee to carefully read SESAC Suspended Platform Safety Procedure located in their *Employee Quality and Safety Procedure Manual*.

Step 2: After the employee has read the procedure, discuss and answer any questions the employee may have concerning the procedure.

Step 3: After the employee has read and fully understands the procedure, instruct the employee to fill out and sign the Employee Section.
