

## CONNECTOR PROCEDURE TRAINING VERIFICATION

### Structural Steel and Precast Erectors

#### Instructions:

*Note: The following steps should be administered by a competent project superintendent in order successfully train an employee for connecting steel.*

**Step 1:** Instruct the employee to carefully read **SESAC Connector Safety Procedure** located in the **Corporate Safety and Quality Manual**.

**Step 2:** After the employee has read the procedure, discuss and answer any questions the employee may have concerning the procedure.

**Step 3:** After the employee has read and fully understands the procedure, instruct the employee to fill out and sign the Employee Section.
